Access Assessment

Access photos are required to assess whether delivery is possible and to enable us to accurately quote delivery of the bed. The photos (and or a short video) must show the route from where our delivery drivers will park the delivery vehicle all the way through to the final position of the bed including any steps or stairs. The photos must be accompanied by measurements. The measurements can be supplied as a plan or can be marked on the photos. Measurements for doorways, and hallways are critical so that we can determine turning circles and widths to ensure the bed can be delivered and the number of persons required to make the delivery. Room measurements including the size and location of other furniture must also be supplied to ensure the bed will fit in the desired location. Any furniture that impedes the delivery must be moved prior to delivery. If assistance is required with moving or relocating any furniture that impedes the delivery, please supply photos and details of where it is to be moved from and to, and we will quote accordingly. **We will prepare your quote upon receipt of photos, measurements, and additional requirements.**

Are there any steps or stairs? Yes No

Details: _____

Is assistance required to move furniture? Yes No

Details: _____

Existing Bed

If dismantling and/or moving and/or relocation and/or disposal of client's existing bed is required, please supply photos of the existing bed, and we will quote accordingly.

Is the bed to be dismantled and moved? Yes No
