Unit weight: Classic/Slimline 50kg, Bariatric 60kg

Features

The Air Chair is specifically designed for use in high care environments where patients can be at risk of pressure sores and other pressure management issues. It uses an air cushion in the seat and backrest area, along with advanced foam system and four-way stretch material throughout, to offer excellent pressure relief for those at risk.

To cater for a range of users and requirements, the chair is highly adjustable, including arm rests and head wings that can be lowered below seat level for side transfers, as well as back rest, leg rest and tilt-in-space adjustment.

- Specialised pressure relief and positioning support for elderly and special needs users
- Cushion air cell system in seat and backrest is pressure adjustable for comfort and user weight
- Removable and replaceable four-way stretch polurethane cover, featuring a low moisture transmission rate, keeping the patient cool, dry and comfortable
- No-gap seating surface
- Water resistant to prevent liquid ingress
- Fire retardant fabric and foam
- Built in pressure adjustment pumps to adjust pressure for comfort or to refill air cells
- Completely adjustable for patient positioning, with ergonomic controls for caregiver
- Reclining seat back adjustment
- Seat tilt adjustment – tilt in space
- Leg rest tilt adjustment
- Head rest is height adjustable and removeable
- Multi-position fold away arm rests, wings and footrest pads provide ease of access and transfer
- Individual locking, non-marking castors
- Single rear directional lock castor

Included accessories:
Headrest, Footrest Pads

Optional accessory:
Meal tray
